

COMPENG 2SH4 Project – Statement of Contribution

Your Group Number Hermin3-Kapuri2

Your Name Ishan Kapur

Your Team Member's Name Nerar Hermiz

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.

Ans- I worked on Iteration 1A and 2A on my own. My group member and I worked on Iteration 3 together.

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.

Ans- My partner worked on Iteration 1B and 2B on his own. And we both worked on iteration 3 together.

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

Ans- This collaborated experience was very different as I had only coded individually before this. This was a very helpful experience, and I learnt a lot from this experience. Overall, I bettered my skill of working with a group and learnt how to distribute work and learnt a lot from the actual Project assignment. A problem, me and my partner encountered, was not being able to meet in person for our project due to us living in different cities and we had to work online. This was initially quite challenging as online collaboration was something I had never done and eventually I got used to it and we worked quite efficiently as a team.
